Art Unit: 1616

Applicant's arguments filed 11/4/02 have been fully considered but they are not persuasive. Rejection of claim 16 under 35 U.S.C. 102(b) as being anticipated by DeMil will be maintained for reasons on record and reasons as follows.

Applicant argues that DeMil teaches nothing about increasing the sugar content of grapes. Applicant further argues that declaration (paper no. 16) of DeMil states that copper salts of caprylic amino acids are more effective than copper salts of butyric amino acids.

Examiner argues that DeMil teaches the application of copper caprylglycinate (copper salt of caprylic amino acid) to grape crops. See column 2 lines 55-60, column 3 lines 3-7, column 3 line 40 - column 4 line 13. It is inherent that said application would increase sugar content of grapes.

Allowable Subject Matter

Claims 15,17,19,20 are allowable. The prior art does not teach or suggest the instant invention comprising beet crop. The prior art does not teach or suggest instant invention comprising zinc salt of butyric acid or potato crop.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CAR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1616

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CAR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
